DI16-DO8-ENC4 Digital Multiboard

16 Digital Inputs, 8 Digital Outputs and 4 Counter Inputs

CRC/DI16-DO8-ENC4

The combi-card comes with 16 digital inputs, 8 digital outputs and 4 inputs for capture of incremental encoder signals, RPM measurements, angle, frequencies etc., available as plug-in module for the imc CRONOS*compact* or as configuration module for imc CRONOS-SL.

Each 8-bit group of digital inputs can be configured by means of a wire jumper in the connector for the acquisition of either TTL-signals or 24 V signals. The 4 inputs for the capture of counter signals can be paired up to capture dual-track encoder signals.

Order Code: (not separately available)
