

## imc Test & Measurement purchases KMT Kraus Messtechnik

Berlin-based test and measurement technology manufacturer  
strengthens its expertise in telemetry

Satisfaction all round (left to right): Martin Kraus, Kai Gilbert and Petra Kraus

**Berlin, 10 November 2020 – With the signing of an agreement on Tuesday, 3 November 2020, Martin Kraus, Chief Executive Officer and owner of KMT Messtechnik GmbH, and Kai Gilbert, Managing Director of imc Test & Measurement GmbH, sealed the sale of KMT to imc. With this step, imc continues to extend its expertise in the area of telemetric data acquisition.**

KMT Kraus Messtechnik GmbH has vast expertise in the area of telemetric data acquisition. KMT has been developing and producing telemetric solutions for the world market for 40 years. Since 2017, imc and KMT have been working together in partnership. KMT products complement imc's range of solutions through digital modular telemetric systems for the railway and aerospace industries, as well as for industrial applications. Collaboration between imc and KMT extends from joint sales activities through to cooperation in the development of solutions. An interface providing the digital and synchronous connection of imc measurement systems with KMT telemetric systems has already arisen out of this cooperation.

Kai Gilbert, Managing Director of imc, states: "With the purchase of KMT we are driving forward the complete integration of KMT telemetry into imc measurement systems. This makes imc the only measurement technology manufacturer on the market to offer its customers a completely integrated solution for telemetric measurement data acquisition."

Martin Kraus, CEO of KMT Kraus Messtechnik GmbH, expressed his satisfaction: "Our collaboration with imc since 2017 has brought enormous gains to KMT customers. They attain a comprehensive solution for their measurement and monitoring tasks more simply, faster and more economically. Using the digital interface that we developed together with imc, users can directly connect KMT telemetry to imc measurement systems and achieve comprehensive test solutions – without needing to bother about data formats or synchronization. We see further added value in imc's worldwide service and sales team that is now also on hand to provide help and advice for KMT customers."

Martin Kraus remains CEO of KMT Kraus Messtechnik GmbH and continues to bring his many years of experience and his expertise to the company.

## imc Test & Measurement GmbH

imc Test & Measurement GmbH is a manufacturer and solution provider of productive test and measurement systems. Together with its customers from the fields of automotive engineering, mechanical engineering, railway, aviation and energy, imc implements metrological solutions for R&D, service and manufacturing. Every day customers use imc measurement devices, software solutions and test benches to validate prototypes, optimize products, monitor processes and gain knowledge from measurement data. The performance promise “productive testing” is consistently pursued by imc. The company offers its customers top technological performance along the entire measurement chain.

The core of the product portfolio consists of imc's modular measurement, control and automation systems, which are supplemented by custom-fit sensor and telemetry systems for customer applications. Using the imc software platform, users can quickly and easily implement comprehensive test and measurement processes, perform real-time analyses and automate test benches. With powerful software tools for the analysis and management of test and measurement data, as well as cloud services, imc sets trends in future technologies, such as smart data analysis, and brings measurement technology solutions to industry 4.0 and the Internet of Things (IoT).

imc has particular expertise in the design and production of turnkey electric motor test benches. Equipped with state-of-the-art test procedures, such as load-free acquisition of motor parameters and automated test sequences, they accelerate customer testing. imc test benches work reliably worldwide, both in R&D and in production environments.

As a solution provider, imc offers its customers an attractive range of services. These include project consulting, contract measurements, data evaluation, outsourcing of specialists, customer-specific software development and system integration.

imc customers benefit both nationally and internationally from a strong expertise and sales network that implements test and measurement solutions locally in more than 25 countries.

Founded in 1988 in Berlin, the company employs around 250 people at three locations in Germany. Together with other companies, imc forms the "imc group". These include the international headquarters in France, Switzerland, the Netherlands, the USA and China, as well as the German sensor and telemetry specialist CAEMAX Technologie GmbH. A strategic partnership also connects imc with the telemetry specialist KMT Kraus Messtechnik GmbH.
